INVERLEA NOTES

Last Friday, Claude, Emerson and Charlie Walroth were the hosts at the weekly "social evening." To say everything was a huge success is putting it mild. People from far and near were there.

The first part of the evening was spent playing five hundred. Twelve tables participated. Miss Patterson won ladies' first prize. Mrs. Garwood the second, and the consolation to Mrs. Fieldhouse.

Bob Fenwick won gent's first (Bob says that's what he can do when he has good players for partners.) The second went to F. Landymore and consolation to Mr. Jackson.

After the cards came a bountiful lunch presided over by Mrs. Walroth, the boys' mother who acted as hostess for the evening. The rest of the evening the young folks danced and the others visited until the gathering broke up, with every one agreeing that the boys' had provided a real good time for all.

Mrs. Ken Borbridge spent a few days this week in Airdrie the guest of Mrs. Davis.

Eric Landymore came up from Calgary to spend the week-end with relatives in the district.

Miss Margaret Collicutt who is attending high school in Calgary spent the week-end with her parents at Willow Springs Ranch.

A lot of people believe that the old-time gallantry is a thing of the past. The boys at the Collicutt ranch will assure you that such is not the case—at least not as long as Jimmy Watson is around.

Enjoyable Whist Party

The Crossfield Legion held a very successful court whist drive in the Oliver Hotel dining room on Wednesday evening. Fifteen tables were in play. Ladies' first prize going to Mrs. D. J. Hall; second prize to Mrs. Mossop, and consolation to Mrs. M. Thomas. Gent's first going to W. H. McCool, second to W. D. McCool; consolation to Geo. McLeod.

Local News

Jim Sharp has entered into partnership with W. A. Hurt in the blacksmith business and has moved back to the old Jessiman shop.

Wm. Russell who farmed the McNichol place near Madden, last year, has moved onto his own farm south of Crossfield.

Mr. and Mrs. G. G. Huser and Mrs. E. E. Anderson came up from Calgary on Friday last to attend the U.F.W.A. dance.

Geo. McLeod attended the annual Oddfellows ball at Didsbury on Friday. A crowd of over 400 attended, and George had the honor of acting as M. C.

Hon. Mr. Justice Clarke and Mrs. Clarke of Calgary spent Friday in town the guests of their daughter, Mrs. C. H. McMillan and Mr. McMillan.

The beer parlor of the Oliver Hotel has been redecorated, and the pictures that graced the walls for many years have been taken down and in their place hung beautiful pictures from the artistic brush of Adam Cruickshank.

The great British picture "Sunshine Susie" has been held over at Vancouver, and will be run in Carstairs on March 27 and 28. This picture was to have been shown at Carstairs on March 20 and 21, but was playing at Vancouver, and held over a whole week.

A meeting of the Crossfield Baseball Club will be held in the Chronicle office on Friday evening, Mar. 31st at 7 o'clock. It is possible that a team representing Crossfield, Carstairs, and Irricana will be combined and entered in the Calgary Amateur League. A good turn-out of fans are requested at this meeting.

Court whist cards, bridge score pads, tally cards, and playing cards are sold at reasonable prices at the Chronicle office.

LICENSE FEES TO BE CUT \$5.00

General reductions of \$5 on all Alberta motor car licenses will be made effective on Monday, April 3, according to an announcement made in the legislature on Monday afternoon by Premier J. E. Brownlee.

The general reduction thus brought into effect is estimated to reduce government revenue from this source by \$160,000, but this is expected to be at least partially offset by the increase in the gasoline tax from five to six cents a gallon.

The Premier also pointed out that conforming to past custom there would be the usual half yearly reduction in motor licenses fees commencing on August 1.

Between April 3 and Aug. 1 those who take out licenses will pay \$5 less than they would, had they taken their licenses out between Jan. 1 and April 3.

Reductions in motor license fees to take effect on Monday, April 3, would not be retroactive, Premier Brownlee stated in reply to questions asked in the house on Monday.

The Poor Man's Luxury

When the Dominion budget changes are put into effect you will have to pay an additional 20c on a 10 lb. sack of sugar. "The poor grow poorer and the rich grow richer."

Spelling Match at East Community, March 24th.

The annual spelling match, in which the following schools will compete, namely: Floral, Elba, Tany-Bryn, Oneil, Meadowside and Rodney, will be held in the East Community Hall on Friday afternoon, March 24th at 2 p. m.

Suitable prizes will be given the winners. Lunch will be provided. The public are invited and there is no charge.

Huge Crowd at St. Patrick's Dance

The Floral Local U.F.W.A. St. Patrick's Calico dance drew one of the largest and happiest crowds yet seen in the East Community Hall. The door receipts amounted to \$98.00.

Prizes for the best calico costumes were won by Miss Alma Stewart, Mrs. O. Bills, Tunis Robinson, and Charles "Shorty" Jones.

The music was supplied by the Melody Boys. This splendid musical aggregation has been a real asset to the East Community Hall, as the fortnightly dances held during the winter have been attended by capacity crowds.

I SAW:—Len Christmas on his way down town with a basket of fresh crabs....

Len Pullan looking lonely and sad.... Dr. Williams kidding Dr. McClelland about his dancing.... George paying off on the instalment plan.... Dan Hays and Bob Smart critiquing Adam's work of art.... Andy looking at a crossword puzzle and wondering what in the world it was.... Norman Johnson, Evan Gordon and Hall McCaskill all working on a jig saw puzzle at the one time....

Harry Fitzpatrick with a button hole of real Irish Shamrock on St. Patrick's Day.... Harve McCool as busy as a bee taking in money at the calico dance.... Geo. Leask voicing his disapproval of Premier Bennett and his tax on the necessities of life.... Sterling Jones getting ready to move to the north country.... John Zauni taking home a new radio.... Art Heywood pitching horseshoes....

Visitor: "What's up, had a bad day?"

Lawyer: "Yes I've lost more than \$5,000 and the worst of it is that \$50 of it was my own money."

Everything has good points. Taking a deep breath after a long kiss develops a girl's lungs.

A Financial Jig Saw Puzzle.

The fact has been noted in this column on previous occasions that during the past two or three years everybody has been discussing the monetary situation prevailing in the world today, and expressing opinions and offering solutions in regard thereto even though they lacked the most elementary knowledge of the subject. People informed and uninformed, from the most outstanding economists and financiers to the most indifferent student or casual newspaper reader, have discussed banking, currency, credit, the gold standard, inflation, deflation, international exchange, and a host of allied subjects, with the same freedom and frequently with the same assurance with which they are in the habit of discussing the weather.

This, of course, people have a right to do, but the net result has been the dissemination of a vast amount of misinformation and utterly unsound theories, the outcome of which is that large numbers of people are not thinking straight on this important subject, while the majority of the population are hopelessly bewildered and confused, and do not know whose or what opinions to accept as sound and a safe guide to action.

Nor is this to be wondered at, because even some of the most generally accepted theories—theories advanced by world famous economists—have been proven incorrect when put to the test of actual experience. This was demonstrated in most startling fashion in the United States in the last few days of February and the first days of March. Even as the line moved with great rapidity, and the outcome was to upset previously held views in some important particulars.

Great Britain went off the gold standard in order to check the draining away of its gold reserves and to stop the export of gold from the country. It frankly and officially announced it had gone off the gold standard. The United States had accumulated more than a third of all the gold in the world, yet it, too, reached the point where it was necessary to stop all gold export, just as Canada had stopped it. But, unlike Great Britain, both Canada and the United States insisted they were still on the gold standard. So, people are asking, what is a gold standard? Just what does it mean?

But the most surprising development of all came in the United States. The Government authorized the issue of some billions of dollars of new paper money which was not backed by gold at all, yet the Government insisted the country was still on the gold standard. The issue of this new currency was cut-and-out inflation, nevertheless the Government announced it was "sound money," notwithstanding that it had no gold backing, because it was supported by real assets.

Now, according to formerly generally accepted financial opinion, the issue of such new currency unbacked by gold would have the effect of depreciating the value of the country's currency. That is, the United States dollar would drop in value in relation to the currencies of other countries. The amazing thing that happened was, instead of the United States dollar being worth less in terms of Canadian dollars or British pounds, it actually increased in value and was worth more. The discount on the Canadian dollar in the United States was increased, and the premium on the United States dollar in Canada became larger.

This process was exactly the reverse of what every financial authority and authoritative economist in Canada had been telling the people of this Dominion would be the effect of inflating our currency by the issue of new paper money which was not supported by a gold backing. Such inflation, we were told, would be the abandonment of "sound money," would result in a further depreciation of our money on the world's money markets, and would seriously injure our credit. But the United States proceeds to inflate to the tune of billions of dollars, the Government declares it is "sound money," and instead of United States dollars depreciating on foreign exchange markets, they actually increase in value.

If this is the effect in the United States, why should an exactly opposite effect be the result in Canada if a similar policy was indulged in? It will be interesting to hear the explanations of our Canadian financiers and economists.

It has been widely contended that inflation should be indulged in by Canada to an extent sufficient to bring the Canadian dollar to a parity with the British pound and thereby promote a larger exchange of trade between the two countries and secure to the primary producer in Canada a better price in Canadian dollars for the products he sold in Great Britain. But, it was likewise argued, the same effect would be to increase the already heavy premium Canada is now obliged to pay on all its commitments in the United States.

But, as already noted, inflation in the United States has not worked this way, but in exactly the opposite way. It has not brought the United States dollar near the British pound, but farther away from it. It has not decreased the premium which Canada has to pay in New York, but increased it. If inflation worked the same way in Canada it would not prove an advantage to the primary producers, who have been urging inflation, but impose a further loss upon them; it would not add to the burden of our governments and business interests having large commitments to meet in New York, and who have therefore opposed inflation, but it would assist them.

It is all far more complicated and confusing than a jig-saw puzzle because the pieces do not fit together at all, while in the popular puzzles of today the pieces can be made to fit.

Fortune In Antiques

Furniture Discovered By Collector

Makes Hotel Owner Rich
A hotel owner in New York has learned he has a gold mine in the lobby of his hotel in antique furniture, bronzes and works of art valued conservatively at more than \$200,000. The treasures had been there 10 years, and were regarded as just so many ornamental additions to the hotel's standard equipment.

An antique collector, passing through the lobby, fell on his knees in front of a \$3,000 Louis XV. parquetry desk, searching for the maker's name. It was being used as a common writing desk in the ladies' writing room. Nearby was a \$10,000 English grandfather's clock, an Elizabethan table of carved oak, some rare marble and bronze statues and huge Italian marble masterpieces worth \$50,000. The collector sought out the owner, and offered to buy certain articles at prices which made the hotelman immediately consult a dealer.

The owner said the things had been collected by his father-in-law, now dead, who was former owner of the hotel. They had been placed there after his death because the heirs had no other place to put them.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted. I was heartbroken until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they took gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J.P.T., Montreal.

Lakes Failed In Ice Yield

Nova Scotia Faces Ice Famine Due To Mild Winter

Nova Scotia is facing an ice famine and no matter how much the price of other commodities may drop, the price of ice is due for a sharp rise next summer. The thousand lakes which have hitherto yielded an annual harvest to the ice men have failed in their yield and instead of the customary sixteen to twenty inches have shown only three to six inches.

Truro is probably the only town in Nova Scotia where the cutters were able to cut the blades into the usual depth. Truro ice men are preparing to stock an extra supply to meet demands from the outside market.

Winter passed Nova Scotia and particularly Halifax very lightly in 1932-33. Following the warmest December in 29 years, January and February were unusually mild. The thermometer did not once touch the zero mark and while terrific storms swept the coast these were mostly rain and wind.

Queen Prefers Comedies

Nothing Else On Talkie Program Chosen By Queen Mary

The Queen's preference in moving pictures is for comedies. So the public learned when it visited the theatre where the Queen saw her first talking picture. The program chosen by Queen Mary was composed entirely of comedies, headed by a popular British film. Proceeds were devoted to the Richmond Hospital. The younger members of the Royal Family have been "talkie" fans for a long time.

Conserving Motor Fuel

Following the increased use of horses everywhere, word now comes from Greece that the days of the motorcar are numbered. As a fuel conservation measure, the bending even-numbered license plates can be operated only on Monday, Wednesday and Friday, and those with odd numbered plates on Tuesday, Thursday and Saturday.

Fruit Trees In Canada

There are 276,472 acres planted to fruit trees in Canada, according to information obtained from the decennial census taken in 1931. On this acreage there are 10,548,918 apple trees; 1,015,465 peach trees; 601,502 pear trees; 222,875 plum trees, and 667,705 cherry trees.

"Poetry should be written on one side of the paper only, shouldn't it?" asked the young versifier.

"That depends on the poetry," replied the editor, wearily. "Lots of it shouldn't be written on either side."

Portugal's wheat crop last year was the largest on record.

Caribou and Fish Plentiful

Trader Says Depression Means Little In Sub-Arctic

Depression means little in the north country where there is abundance of fish and large herds of caribou, according to James Darvish, fur trader of Port Rae, on Great Slave Lake. It was the trader's first trip out of the "Territories" in 20 years.

Modern conveniences, such as a radio and aeroplane, have greatly changed life in the sub-Arctic, Mr. Darvish said. The 700-mile journey from the end of steel to Port Rae, formerly a month's trek by dog team, today is covered by plane in six or seven hours.

Mails are delivered monthly in place of the old half-yearly service, and a fur trader now can move his fur "outside" and sell them shortly after they are trapped.

Returned To Land

Over Three Thousand Families Assisted By C.N.R. Last Year

Nor since the war has Canada experienced such a landward movement from urban communities as that which has taken place during the past year, according to a report issued by Dr. W. J. Black, director of colonization for Canadian National Railways.

The department has assisted 3,402 families during the past year in finding new farm homes, involving a total of half a million acres of land. The department also co-operated in the settlement of 1,413 unemployed families under the relief settlement plan, financed on a tri-partite basis by the Dominion and Provincial Governments and the municipalities in which the families had lived.

Sun Will Shine Again

The sun will shine again. One does not require an axis and unfounded optimism to know that this is true. The world is being readjusted after an extraordinary economic strain, its efficiency and waste are being routed, and in the end there will be unsurpassed opportunities for enterprise for the trained mind.—Ottawa Journal.

Work Of Flying Squad

The famous flying squad of Scotland Yard made over 600 arrests last year. Four hundred and fifty cases involved violent prisoners and one hundred and fifty of them carried arms. The Flying Squad has less than forty members.

Denmark is considering a new-road program calling for the expenditure of \$27,000,000.

For Creamed SOUPS and SAUCES

Charles Milk has the recipe for cream soups and sauces. It is handy and economical. Use it and you can make hundreds of tasty dishes that you and your family will enjoy.

Always ask for St. Charles by name and that you can be certain that you are obtaining the best prepared milk.

ST. CHARLES MILK

Wheat In Perfect Condition

Inspection Shows Wheat Stored In Churchill Elevators In Good Shape

The 2,500,000 bushels of wheat in the Churchill terminal elevators are in perfect condition, according to T. O. Cliff, general superintendent of the plant, who arrived at The Pas, Man., aboard the bi-monthly "muskeg" train from the sea. Mr. Cliff and a staff of experts, as well as representatives for the board of grain commissioners, Winnipeg, spent two weeks inspecting the grain in storage in the port.

Tests were made concerning temperatures in a number of bins. The power plant was also put into operation, and was said to have functioned well.

This was the first mid-winter test of grain in Churchill. It is said that the first elevator operating crew will move into port about the middle of May.

Passenger from Churchill stated that the shore ice at the mouth of the harbor extended about three miles into the bay. One man versed in harbor work under low temperatures stated that ice-breakers could open Churchill harbor for shipping now, so far as the port was concerned.

Recipes For This Week

(By Betty Barclay)

CREAM OF POTATO SOUP

4 medium potatoes.
2 slices onion.
2 strips bacon.

Wash, peel, cut in cubes, and cook potatoes in enough water to cover until tender. Rub through a strainer. There should be 2 cups mashed potatoes and liquid. Add this mixture (left-over potatoes may be used) to 3 cups of thin cream sauce (3 cups milk, 3 tablespoons flour, 3 tablespoons butter, season to taste. Add 2 tablespoons chopped parsley before serving).

A different flavor may be obtained by adding catsup, leeks or celery instead of onion. Cut leeks or celery in very thin slices crosswise and cook in with the potatoes.

ORANGE SALAD STRAWS

1 cup flour.
4 tablespoons shortening.
½ teaspoon salt.
½ teaspoon grated orange rind.
1 tablespoon sugar.

Orange juice.
Work fat gently into dry ingredients with finger tips or cut in with pastry cutter. Reserve one-fourth of mixture and add orange juice to rest to make a usual consistency of pie dough. Roll out to about 6 inches in diameter. Spread over about one-third the dry mixture reserved at first, fold it in shape of an envelope, roll again and repeat until dry mixture is used up. On last folding spread 1 tablespoon of butter over dough. Cut into strips of any desired shape and width and bake in a quick oven.

There are five Jewish governors in the United States: Lehman of New York, Homer of Illinois, Schultz of Florida, Seligman of New Mexico, and Meier of Oregon.

An aeroplane travels 10 to 15 miles in writing a two-word name on the sky.

Processes for refining used oils are being tested in Italy.

Canada Commemorates

First Airplane Flight

Plans Used For Machine Were Drawn

The first airplane flight in Canada on February 23, 1909, exactly 24 years ago was recently commemorated in the International Airmail Society releasing a special cachet featuring a Maple Leaf, with the scene of the episode, Baddeck, Nova Scotia, inserted. The name of the airplane "Silver Dart," which was piloted by J. A. D. McCurdy, who now is president of the Montreal Aircraft Industries, is printed in large type. The distance then flown was one-half a mile with no mishaps reported in landing.

Associated with Mr. McCurdy in the construction of the gasoline motor-powered "Silver Dart" were Dr. Alexander Graham Bell, F. W. Baldwin, grandson of Hon. Robert Baldwin, Premier of Canada before Confederation; Glen R. Curtis, Ian C. Morgan, president, International Airmail Society, said in his review of the circumstances under which the flight was undertaken. Mr. McCurdy is a graduate in engineering of the University of Toronto in 1906.

Added interest to the event was the fact that Mr. McCurdy, a Baddeck man, had drawn the plans, so that the machine which made the first flight in Canada primarily was a Canadian product. In honor of the occasion, the Baddeck Town Council presented an engraved testimonial of esteem to Dr. Bell and Mr. McCurdy, including these in their historical records.

International Bridge Match

Contest Between England and United States To Take Place In June

The long-promised contract bridge match between England and the United States will take place in June. Ely Culbertson, the famous American player, has accepted Lt.-Col. H. Beasley's challenge to play a duplicate match in London.

Details were settled by cable, and they provide for a return match in New York. The United States team will comprise Mr. and Mrs. Culbertson, O. Jacoby, T. Lightner and M. Gottlieb. Lt.-Col. Beasley has Mr. Culbertson's letter of acceptance and all that now needs to be done is to find a suitable place for the match. It is intended that the public shall be admitted.

"The selecting of our team," said Lt.-Col. Beasley, "will not be easy. Mr. Culbertson's team is about the strongest formation that could be chosen. Whatever happens it must be a real trial of strength; there must be no saying afterwards. This was not England's best team."

Kingston, a new variety of cheese, developed at the University of British Columbia, is claimed to be so easily digestible that it may be safely eaten by either infants or invalids.

Placing the Blame

Sun Spot Caused Recent Radio Disturbance Says Professor

Was your radio full of rumbles, roars, squawks and squeals during a recent week? If it was, blame the sun, says Professor John Gold, director of the Bucknell University Observatory.

Through a telescope, he said he spied a spot on the sun, with an estimated diameter of 5,000 miles. This spot was at the minimum of its cycle, unusual at this stage. Professor Gold said similar but much larger spots upset telegraph and telephone systems November 17, 1882.

Empire As Security

The British Empire was put up as security for a loan of \$3,000 in the United States money to pay off the 500 sailors of the British cruiser "Norfolk" in New Orleans, on a courtesy call. The ship's payroll date fell due with all banks closed and the sailors faced shore leave without spending money.

Wealthy Chinese of Manchuria are flocking to Peiping, China.

Spectacular Scenic Route For Prairie Motorists Through Rockies To The Pacific Coast

One of the most spectacular routes available to the motoring public of North America passes through the very heart of the Canadian Rockies, traversing the great mountain playgrounds of Banff and Yoho National Parks. Providing access to such well known beauty spots as Lake Louise, Moraine Lake, and the valley of the Ten Peaks, Emerald Lake and the Yoho Valley, the western half of this highway is continuous but now the uncompleted section across the Selkirk Range. This last named section, which is known as the Big Bend Highway, is being jointly constructed by the National Parks Service of the Department of the Interior and the Government of British Columbia.

Pending the completion of the last link in this trans-mountain road now under construction along the great northern bend of the Columbia River, motor tourists may bridge the Selkirk by shipping their automobiles via Canadian Pacific Railway from Revelstoke, B.C., to Golden, B.C., or vice versa. With the exception of these 91 miles which must be made by rail, an uninterrupted trip may be enjoyed from the Coast to the Prairies.

A special service providing for the carriage of automobiles between Revelstoke and Golden will be inaugurated on June 15, and extending to September 15, semi-weekly in each direction in passenger train service. Automobile baggage cars will be attached to regular passenger train No. 2, eastbound from Revelstoke on Saturdays and Tuesdays, and to train No. 3, westbound from Golden on Sundays and Wednesdays. This arrangement will provide motorists with a direct route to or from the Pacific Coast through the Canadian Rockies.

The train journey between Golden and Revelstoke will be made by daylight, and there will be no delay or unnecessary expense. Motorists and their automobiles will be carried on the same train and made available for immediate delivery on arrival at Golden or Revelstoke.

The rates for carriage of automobiles between the stations mentioned will be according to wheelbase, as follows: wheelbase up to 115 inches, \$12.50; wheelbase over 115 to 125 inches, \$15; wheelbase over 125 inches, \$17.50.

Each automobile must be accompanied on the same train by at least one passenger holding regular first-class ticket, single fare \$3.65. All other occupants of the automobile travelling by train must hold valid railway transportation. Automobiles should be delivered to the Company's agent at shipping point at least one hour and thirty minutes prior to departure of train, or approximately before 11:35 a.m. at Revelstoke, and 12:45 p.m. at Golden.

The advantages of this service in providing tourists travelling either east or west with an all-Canadian route are obvious as formalities with immigration or customs officials are made unnecessary.

Experience Is Required

To Determine Best Time For Turkey Egg-Laying

Just as soon as the spring weather comes, turkeys should be fed for egg production, and laying should commence about the middle of April in Eastern Canada and somewhat sooner in Western Canada, with its earlier spring opening—especially in British Columbia, says Mr. A. G. Taylor, Poultry Husbandman, Dominion Department of Agriculture. Much depends on the weather becoming really springlike as to the time for forcing laying, as eggs laid too early would have to be held too long before setting. This important question must be practically left to the discretion of the attendant. To get turkeys laying just at the proper season requires experience, and beginners should be cautious in this regard. Turkeys should be wintered where they are expected to lay in the spring.

Flexible Window Glass

An inventor in Austria has produced a synthetic window glass, warm to the touch, and somewhat flexible. The process developed for the new "glass" is a closely held trade secret but it is understood that a chemically treated wood product is an important material used.

Pretty girls are becoming successful snugglers in Europe.

Shortage Of Food Supplies

Marketing Authority Predicts Increase In Cost Of Food

An immediate rise in the prices of food and commodities is predicted by W. B. Somerset, chairman of the Ontario Market Board. Statistical views of farm products, he says, have indicated an upward trend for some time and the turning point has been reached.

"World supplies of food, clothing, basic and manufactured goods have been running short," Mr. Somerset stated, "and must reflect this shortage in terms of money. It may even dictate adjustments in terms of essential values. Shortage of butter, cheese, eggs and bacon is particularly marked."

Aiding the Blind

Braille Magazines Have Been Published In Many Languages

Approximately 50,000,000 pages of Braille literature in the form of books, magazines and music have been produced for the blind by the American Braille Press for War and Civilian Blind during the 10-year period of service just ended, according to William Nelson Cronwell, president and founder of the organization.

Reading matter and music published by the American Braille Press have been distributed in more than 40 countries, Cronwell said. In addition to three monthly Braille magazines, in English, French, German, Italian, Polish, Rumanian, Serbian, Spanish and Flemish.

By Ruth Rogers

SPRING IS IN THE AIR

It's so fresh and lovely in crepe print. It's all puffed up about its sleeves! And isn't the buttoned wrapped bodice smart? It's lovely now 'neath the winter coat in a vivid-red or blue and white print in crinkly crepe silk. And you can wear it right through the spring and summer.

It's easily made and will cost no little. Style No. 991 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards of 39-inch material. Price of pattern 20 cents in stamps or cash (coin is preferred). Wrap cloth carefully.

GREAT RUGBY DAY AT TWICKENHAM

A scene taken during the International Rugby Match between England and Ireland at Twickenham, when England won by seventeen points to six. In the picture an Irish half-back is being well tackled in an attempt to break away after a scrum.

Syrup From Sugar Beets

Method Simple and Easily Carried Out In Home

Owing to the many inquiries being received from farmers who wish to make an edible (table) syrup from sugar beets the Division of Chemistry at the Experimental Farm, Ottawa, has been making further experiments to ascertain the possibilities of making a palatable wholesome and good appearing syrup for home use.

The method is quite simple and can easily be carried out in the home and is as follows:

The beets are first washed and the crowns cut off at the lowest leaf scar, or lower, and the beets peeled, crowns and peelings being rejected. The beet is then sliced longitudinally (lengthwise of the root) and put through a meat chopper. This ground pulp is put at once before oxidation takes place, into a piece of cheese cloth which has been tied over the top of a fairly large pot containing water. The pulp is then suspended in the cheese cloth over the water but not touching it. An inch or so of water in the pot should be sufficient to start with. Put on a tight lid and boil for half an hour vigorously. After half hour's boiling, wash pulp with warm water allowing this wash water to run into the pot, using as little as possible. Fill the cheese cloth bag with pulp two or three times using the same solution in the pot for steaming the second and third batches. Filter this weak sugar syrup through a good cotton cloth and evaporate it to less than half its volume. Allow this to stand overnight so any solid matter that has come down during the evaporation may settle out. In the morning pour this clear syrup off the solids and boil down to consistency of maple syrup, taking off any scum that comes to the top and being careful not to scorch or burn. Bottle or put in jars while still hot and seal tightly.—Experimental Farm Note.

Resembles Trip Of Columbus

Way Present Day Trend Strikes Owen D. Young

One of the best stories going around Washington is Owen D. Young's description in a recent director's meeting of how the business world is acting in the depression. "It strikes me," he said, "that we're all in the same boat with Christopher Columbus. He didn't know where he was going when he started. When he got there he didn't know where he was. And when he got back he didn't know where he had been."

The man who built a two-car garage in 1928 was forethoughtful after all. He keeps the car on one side and lives in the other.

The Interesting History Of The Development Of Instruments For The Aid Of Navigation

Clever At Camouflage

Wild Creatures Make Themselves Appear One With Their Surroundings

Color plays an important part in the lives of wild creatures, writes O. G. Pike, the naturalist, in *Tri-Bits*. Some are able to change their color to correspond with surroundings, and so perfectly do they accomplish this that even trained observers will sometimes pass them by.

The English Woodcock, when sitting on its nest among dead leaves, would often be overlooked if it were not for its bright eye, which stands out like a brilliant black diamond. When the ringer plover stands still on the stones of the seashore it is practically invisible at a distance of thirty yards, and its near relation, the Kentish plover, is even more difficult to detect.

It has been said that no one knows the natural color of the chameleon, for one specimen may appear in half-a-dozen different dresses in as many days. If we place it on a green background, it soon becomes a similar green; remove it to a dark brown, and when one thinks a record has been obtained of its wardrobe, it suddenly appears in an entirely new creation. If different colored light is focused on each side of the chameleon, each side will take on that particular color, while in the dark it takes on a cream color.

A little-known tropical creature called the amfibated gecko is a rapid quick-change artist, for it can make itself practically invisible at a distance of a foot. During the day it clings against its resting place, which may be the bark of a tree covered with lichen, and every changing hue of the latter is faithfully reproduced upon the body of the gecko. The body itself is fringed with irregular lobes of skin, which help to fade it into the background, but its bright eye will often give it away.

Lindbergh Not Dull Student Usually Well Up In Classes Says Physics Teacher

To millions of people Charles A. Lindbergh is the "Lone Eagle"—the young aviator who made the first solo eastward crossing of the Atlantic in an airplane; but Dr. Richard Hamer of Halifax remembers him as a fairly bright student in the class he conducted at the University of Wisconsin 10 years ago.

Dr. Hamer was conducting research work at the university in connection with his degree in philosophy, and taught physics to a group of engineering students classed as "difficult." Young Lindbergh was a member of this group.

Although America's future aviation idol was subsequently let out from the university, after falling behind in several subjects, Dr. Hamer asserts that he was deeply interested in physics.

"While he was generally regarded as a dull student, I did not find him so," the doctor recalls. "As a matter of fact, he was usually well up among the leaders in my class."

Dr. Hamer recollects that Lindbergh was deeply interested in the deviations in the magnetic field of the earth. On one occasion, he asked if it were not possible to locate one's self at any given point on the earth without taking a position from the sun or stars, and simply by calculating the magnetic intensity at that spot.

The doctor told him at the time that this could be done and explained the principle on which such a step would be based. Later, this principle was used in the development of the earth inductor compass, which guided Lindbergh over the wide Atlantic stretches when he made his famous solo hop from New York to Paris.

Entry Depends On Tests

Hubert Scott-Paine, British challenger of Gar Wood for the Harmsworth trophy, has announced through J. Lee Barrett, secretary of the Gold Cup committee, that he will not enter a craft in the race this fall unless experiments this summer prove to his satisfaction that he has a worthy challenger of Wood's boat.

Another important event that occurred during the early part of the Eighteenth Century, and which deserves more than passing notice was the perfecting of the chronometer, by the brothers Harrison, thus enabling mariners to find their longitude with an exactness hitherto impossible. Latitude, the distance north or south of the Equator, was fixed in the eighteenth century by observation with the quadrant, which was a sufficiently reliable instrument; but longitude, the distance east or west, had baffled both navigators and scientists alike from the beginning of history. Philip III. of Spain offered a prize of 1,000 crowns to anyone who could discover a satisfactory way of finding longitude, and then the States of Holland announced that they would award 50,000 florins to the successful solver of the problem.

Nothing, however, came of these offers, and inability to determine their longitude still remained a cause of frequent disaster to sailors on badly charted coasts. Wrecks were of common occurrence, and lighthouses were few. Indeed, as we know them now they did not exist. Apart from the remains of the Roman pharos at Dover and at the Isle of Wight, the few castles were paid beacon fires placed on some of the more prominent headlands of the European coasts.

The tragic loss of Sir Cloudesley Shovel's fleet in October, 1707, on the Scillys moved the English Government to offer a prize of 20,000 pounds for the discovery of a method of finding longitude with reasonable accuracy. After many years of the most patient work and experimenting John and William Harrison, in 1765, constructed a reliable chronometer, and the prize, after much delay, was paid in full. Thus the chronometer did for longitude what the quadrant and sextant had done for latitude.—*The Ridge in The Twentieth Century*.

London's Lord Mayor

Spends Half His Time Dressing For Formal Functions

Sir Henry Greenaway, Lord Mayor of London, is a martyr to dress. His job is one of the hardest in the world. Hardly a minute of his day is not taken up with some formality or function.

If that were all it might not be so bad. But Sir Henry must pass approximately half his time dressing for each of these affairs, struggling into heavy robes and decorating himself with the costly ceremonial trappings required of London's Lord Mayor.

The Lord Mayor in a year must foot the bill for about \$50,000 worth of banquets and receptions, not to mention the expensive Lord Mayor's Show and his ceremonial wardrobe.

For everyday he wears a scarlet robe decorated with lace, embroidery, gold chains and other impressive impediments.

For evening wear, the Lord Mayor dons a black damask robe trimmed with gold, somewhat like the splendid outfit of the Lord Chancellor.

Old London's Streets Safer

Report Shows Decrease In The Number Of Fatalities

London's streets are becoming safer. At any rate fatal casualties are declining. Last year the number of persons killed in the streets of London was 1,283, and the number injured was 52,456. During the last half of the year there were 46 fewer killed than in the last six months of 1931, and the number of injured decreased by 714.

The private motorcar accounts for the majority of fatal accidents. Less than one per cent. of accidents in London occur where the roundabout traffic system is in operation, and junctions where signals are used are nearly as safe.

Reminded In Time

A traveller who was renowned for his tall stories, on being asked out to dinner, made arrangements with his friends who were to accompany him that they should kick him if he began to go too far.

Quite early in the evening he started off.

"That reminds me," he said to the host, "of a friend of mine who had a rose garden over 10 miles long and"—he felt a kick—"and two inches wide."

The opomun uses its tail as a hand in clinging to boughs.

IT'S LIVED THAT MAKES

YOU FEEL SO WRETCHED

Wake up your Liver Bile
—No Calomel necessary

For you to feel healthy and happy, your liver must pour two pounds of liquids bile into your bowels every day. Without that bile, trouble starts. Poor digestion. Poor elimination. Weakness in the body. General wretchedness.

Now can you expect to clear up a situation like this completely with mere bowel-moving salts, oil, mineral water, laxative candy or sherry gum, or roughage? They don't wake up your liver.

You need Carter's Little Liver Pills. Purely

BRITISH PLAN FOR ARMS CUT IS WELL RECEIVED

Geneva, Switzerland.—The British disarmament plan was laid before the world disarmament conference by Prime Minister Ramsay MacDonald, accompanied by a speech so bold and fervent as to stir the weary conference to fresh life.

He pleaded urgently in an outskout-look to the delegates of 60 nations to stem the stream of apprehension "which is flowing with increasing swiftness to catastrophe."

The plan, drawn up by Mr. MacDonald and Sir John Simon after a week of diligent conversations, will be under world-wide scrutiny for a week, after which the general commission assemblies and debate begins.

The British plan involves substantial reduction of the fighting strength of France and other armed powers, and permits Germany and her former allies to considerably increase their military forces from the maximum figures set by the Treaty of Versailles.

Along with the fact the plan, unlike any others, contains concrete figures, a feature is its provision for security. It contains agreement for a consultative pact by which, if the plan is adopted, leading nations of the world would bind themselves to confer and draw up conclusions immediately there is a breach, or the threat of a breach, of the terms of the Paris peace pact.

The main points of the scheme are five-fold:

- (1). It covers a transitional period of five years, with provision for a second conference to be called before the end of that period to prepare a complete new disarmament convention.
- (2). It contains a proposal for international control to secure that the convention as signed will not be shirked.
- (3). It establishes bodies like the disarmament commission to study further reductions and try to find a solution of unsolved difficulties.
- (4). It gives opportunity for political work being done to restore confidence—essential groundwork of any disarmament.
- (5). It uses the doctrine of neutrality laid expounded by United States Secretary of State Henry L. Stimson.

So far as the military figures go, the plan would allow Germany 200,000 men, double the number at present allowed her. It would cut the French total from 700,000 men, at home and abroad, to 400,000, evenly divided.

In naval affairs, the British plan would extend the London naval treaty to include France and Italy, who failed to join the United States, Japan and Great Britain in restricting totals of cruisers and lighter craft.

No maximum was suggested for the British army, nor does the plan include any attempt to limit non-European forces.

Austria's effectives would be fixed at 50,000, Hungary's at 60,000 and Bulgaria's at 60,000.

The French "allies" would be lined up: Poland, 200,000; Roumania, 150,000; Czechoslovakia, 100,000. Russia would be given 500,000 men.

The plan would extend the London naval treaty to include France and Italy. It also would extend the naval holiday on capital ships to all powers except Italy, which would be permitted to build one ship to balance the new French cruiser "Dunkerque."

Germany would be freed legally from the naval restrictions imposed by the Versailles treaty, but actually her naval power would be fixed at the present level until 1936.

This proposed treaty would remain in force for five years. During that period special international commissions would be created to attempt conciliation and settlement of vexing political problems now disturbing Europe.

Herriot Warns France

Paris, France.—Former Premier Edouard Herriot has frankly warned France that it is to her "essential interest" to pay her three-months overdue debt to United States as soon as possible in view of changed conditions in central Europe.

Cost Of Commission

Ottawa, Ont.—The Duff commission cost Canada \$62,338, according to an answer given in the House of Commons to a question asked by Hon. Ian MacKenzie (Liberal, Vancouver Centre).

W. N. U. 1936

Disastrous Fire In Hull Match Factory

Five Girls Dead and Many Others Seriously Injured

Hull, Que.—Five girls were burned to death here when fire gutted the Canada Match factory, following an explosion.

Firemen poked through the smoking ruins, searching for two who are missing. Twenty-one people lie on hospital beds, seared and charred by the blast and flames.

Roaring up from a misling-tank, the explosion caught 15 girls in the vicinity with staggering suddenness. Little chance for escape was offered. Fire followed immediately on the explosion and in a few minutes the building was a mass of flames. So quick was the whole thing, however, that little could be done. Such injured as could be rescued were taken to the hospital.

The factory was located north of Hull, a block from that section of the Chelsea road known as St. Joseph Boulevard. No buildings were located near it. The fire started near the main entrance of the factory, which was of brick construction and with many windows. The only explanation why so many lives were lost was that the heavy explosion carried the fire to all parts of the structure, and cut off the entrances.

The factory employed about 25 girls, although in normal times double that number would have been at work.

All the girls were residents of the immediate locality and in their teens or early 20's. The bodies taken from the ruins were in the main so badly burned that it was impossible to identify them.

It was felt that at least three more employees were unaccounted for, and some estimates placed the figure as high as eight. The injured were rushed to hospitals by private motor cars and ambulances, and an accurate check on their number or the extent of their injuries could not be made immediately.

Would Maintain Neutrality

Winston Churchill Urges Britain To Avoid European Alliances

London, Eng.—Winston Churchill, former Conservative Chancellor of the Exchequer, urged before the House of Commons that Britain keep herself free from European entanglements.

Mr. Churchill, who was speaking in debate on the air estimates, said that to keep out of commitments on the continent the United Kingdom must be strong enough to maintain her neutrality and must, therefore, carry out his full programme of air defence.

Sir Philip Sassoon, under-secretary for air, presenting the estimates, told the House the Royal Air Force had effected economies with some anxiety as ten regular squadrons were still required to complete the "mace" programme approved as far back as 1923.

In terms of first line strength, he added, the Royal Air Force stood today fifth in the list of air powers, while at the end of the Great War it claimed first place.

Victim Of Dread Disease

Devoted Wife Accompanies Husband To Lepor Colony

Toronto, Ont.—Unfashioning, a devoted wife will brave the isolation of the New Brunswick leper colony on Tracadie Island in company with her diseased husband, it was revealed here. Accompanied by his wife and a nurse, the leper is travelling to the colony aboard a special colonist car placed between locomotive and baggage car.

Victim of the dread disease apparently contracted some years ago in South America, the unfortunate man has been identified as a former well-known Toronto athlete and graduate of the University of Toronto. He and his wife learned the nature of his malady about Christmas time. The victim is of latter middle age and his wife about 50.

United States Backs Britain

Washington.—The United States has disclosed its intention to support Great Britain in a move looking towards international action against nations waging war—undeclared or otherwise—by enforcing against them an embargo on arms shipments.

Empire Materials

Ottawa, Ont.—Empire materials are to be used on government contracts in future. This applies, not only to contracts let by the departments of government but also to the Canadian National Railways and government boards and commissions.

Unemployment Insurance

Saskatchewan Legislature In Favor Of Federal System

Regina, Sask.—Transcendently, the Saskatchewan legislature went on record in favor of the early creation of a national system of unemployment insurance.

George Spence (Lib., Maple Creek), was the mover of a resolution calling in general terms, for provincial support to any efforts of the federal government to establish unemployment insurance.

Hon. J. F. Bryant, Minister of Public Works, moved an amendment, mentioning specifically a national system of unemployment insurance, the creation of a national commission to devise it, and urging that the government of Saskatchewan cede all constitutional rights in the matter to the federal government.

Mr. Bryant's amendment was accepted by Mr. Spence in preference to his original motion, and the House passed it without division.

NO FURTHER BURDENS ON THE B. C. TAXPAYERS

Victoria, B.C.—Not one dollar of new taxation will be imposed on the average taxpayer of British Columbia, said Hon. J. W. Jones, Minister of Finance, in his budget speech in the legislature, but on personal incomes over \$5,000 a year, the government will levy a new graduated surtax progressing from one per cent, on the first \$2,500 to 18 per cent, on incomes in excess of \$50,000. This will be additional to all present levies and is estimated to raise \$350,000.

Succession duties will be raised 25 per cent, which, with further detailed adjustments, will bring a new revenue of \$315,000. The school tax on lands outside school districts is reduced from five to two mills.

The government will spend \$22,729,595 in the next fiscal year as against \$24,693,671 in the year now ending. A reduction of \$1,964,076, or a total cut in departmental expenditures in the last two years of 7,420,518.

Government revenues on estimates "pared to the bone" with "padding" removed, are fixed at \$20,497,591. But the expenditure total contains a provision of \$2,421,620 to be set aside in sinking funds. Thus, while the total revenue and expenditure estimates show a deficit of \$2,232,027, in actual fact there should be no deficit at all, Mr. Jones said. The sinking fund provisions may not be made in full during the next year, but the province will collect more money than it spends, the minister said.

Official Was In Danger

Winnipeg, Man.—"I was afraid the reeve would not leave his office alive if he refused to sign his resignation," said Constable Albeck, of the Royal Canadian Mounted Police, testified before Mr. Justice A. K. Dymally, at the trial of 14 men of the Arborg, Man., district on charges of rioting and unlawful assembly in connection with a disturbance laid November 29.

ENVOY TO BRITAIN

Judge Robert Bingham, prominent publisher of Louisville, whose name has been submitted to Great Britain by the United States for approval as United States Ambassador to the Court of St. James. Judge Bingham was Mayor of Louisville in 1907, Chancellor of Jefferson Circuit Court in 1911, and is trustee of Berea College and Centre College of Danville, Ky.

Registration Of Voters

Compulsory Voting Law For Canada May Be Introduced

Ottawa, Ont.—Indications were seen in the senate debate that recommendations may issue from that chamber for a system of compulsory registration of voters and compulsory voting, for the electors of Canada, and severe penalties involving imprisonment for impersonation at the polls. Right Hon. Arthur Meighen, government leader; Gen. A. D. McRae, Vancouver; Hon. W. A. Buchanan, Lethbridge; and Hon. C. C. Balantyne, Montreal, took part in the adjourned debate.

Senator Meighen observed that in all the speeches that have been made on this subject, since it was introduced a week ago by Senator W. E. Foster, there had been agreement that election costs were too high, and that some change should be made, preferably a system of compulsory registration and voting. He believed a committee of the senate might do some valuable work along this line.

Market Recovery

Prices Of Securities Advance On New York Stock Exchange

New York.—One of the most brilliant recoveries in security prices in the history of the New York Stock Exchange attested the restoration of financial confidence which has swept the United States with the reopening of thousands of sound banks.

Shares surged up \$2 to \$16 in scores of favorite issues. The advance in bonds was just as striking. Many issues were swept up \$10 to more than \$50 per bond to \$1,000 par value.

It was in the decisive measures taken in Washington, rather than in news from business and industry that financial quarters found new encouragement.

AS JAPAN "WALKED OUT" OF THE LEAGUE

This dramatic scene had its brief moment in the world spotlight recently, and its consequences gave the war-weary nations a bad scare. Led by their leader, Yosuke Matsuoka (right), Japan's delegation to the League of Nations at Geneva is shown as it "walked out" on that august body following the League's vote of censure, laying the blame for the Far Eastern trouble on Nippon.

Senate Endorses Bill

Favors Sweepstakes For Charity If Any Province Desires Them

Ottawa, Ont.—Canada's senate endorsed the principle of sweepstakes for charity purposes if any province desires them, when it passed the second reading of Senator A. D. McRae's bill by a vote of 37 to 19.

It was the first time the senate committee on private bills. The impression is that with the substantial majority it received on the second reading, the bill will complete its course in the senate and be sent on to the commons, where an interesting battle may be expected.

A bill has been placed before commons providing that informers seeking money won by sweepstakes winners must first obtain consent of provincial attorney-general before taking action.

London, Ont.—Unanimous votes were recorded in favor of sweepstakes by eight of 10 Canadian legion branches in the London district, it was stated at legion headquarters here. The other two branches had not filed a report.

U. S. WILL SEEK WAY TO REDUCE WHEAT OUTPUT

Washington.—The United States administration revealed itself recently as already considering overtures to other nations looking to mass action against agricultural surpluses and tariff barriers.

As proof of its sincerity in this move for economic betterment, the Roosevelt government will seek from congress broad powers to control farm production and has made clear it stands ready to practice what it preaches on cutting high tariffs if other countries will follow suit.

It was disclosed that already the project of limiting wheat production to the level of world consumption by agreement among the great grain-producing nations, Canada among them, has been discussed informally with representatives of other governments.

This is believed to have entered the recent discussion President Franklin D. Roosevelt had at New York with Hon. William D. Herridge, the Canadian minister.

The president expects that in response to a special farm relief message he will send to congress soon, the present special session of congress will give the executive power to reduce the output of agricultural products in which burdensome surpluses have been holding down the price. The broad authority to be asked is expected to include means for the government to lease from the farmer a part of his acreage to take it out of actual production.

With a firm hand thus regulating the flow of America's exportable farm products, it is felt the president would be able to take a leading part in getting producing nations to agree upon a pro rata apportionment estimated to meet the needs of the world and to pile up surpluses.

The unofficial discussions engaged in thus far have involved a single product—wheat—and were understood to have taken place with the Canadian government.

Through diplomatic channels, further conversations are to be held with the major wheat-producing nations, including Australia and Argentina, with a likelihood the matter will be definitely decided at the international economic conference in London some time this summer.

In the past, as recently as a year ago last summer, unavailing efforts have been made to reach just such an agreement on international control of wheat production. A factor preventing definite results was the inability of the American government to control the domestic output.

All producing countries agreed co-operative action to limit production would end the era of abnormal prices.

Through the same diplomatic channels in advance of the economic conference, high officials of the state department said the United States will seek the reciprocal agreements for lower tariffs.

This strongly worded statement on which the official declined to be directly quoted, gave plain indications of the emphatic attitude of the administration toward the question of tariff barriers.

The administration's stand was emphasized by Secretary Roper, of the Commerce Department, in an address asserting the American people are "tired of a policy that has antagonized every other nation in the world."

BRITAIN MAY SEVER RELATIONS WITH SOVIETS

London, Eng.—Possibility of a severance of relations between Great Britain and Soviet Russia was discussed in political and business circles as a result of the puzzling arrest of British subjects representing a British concern in the Soviet.

No progress toward a settlement of the affair was made at a conference in the foreign office to which the Russian ambassador was summoned. He was requested to impress his government with the serious view of the situation taken here.

Should the case remain unsettled on April 16, when the present trade agreement with Russia terminates, there would be a possibility of an embargo on Russian goods, it was said.

The British government is convinced there is no ground for accusations of sabotage against those who were arrested.

Persons in close touch with Russian affairs expect the opinion the Soviet government may be planning a spectacular trial of the Englishmen, similar to that in which several German engineers were involved several years ago.

It was said such a move, without provision for full defence facilities might result in a break in diplomatic relations.

Moscow, Russia.—Representations by Great Britain in connection with the recent arrest of several British representatives of the Metropolitan-Vickers Electrical Company, were delivered to the foreign minister by the ambassador from London.

It was understood the ambassador did not specifically request release of the prisoners, but indicated that such action would be the course most satisfactory to London.

Maxim Litvinoff, the foreign commissar, said, according to an unofficial account of the conversations, that the Soviet government reserved the right of every sovereign state to deal according to its own laws with persons living within its territory.

A Voluntary Exile

Prof. Einstein Will Not Return To Germany Under Present Conditions

New York.—Professor Albert Einstein announced himself as a voluntary exile for the present from Germany, when he arrived here from California. How long he will remain out of Germany, Einstein said he does not know. But he "will not set foot on German soil as long as conditions are as at present."

He is sailing for Antwerp, to decide his future course.

"I am no Nationalist," he said at a dinner in his honor attended by some of the foremost American scientists, and leaders in finance, education, art and letters.

Without mentioning Germany he referred to "the prevailing disease of an exaggerated nationalism," and said:

"This nationalism is a grave danger for the entire western civilization, which at one time had its origin in Greece. Behind it are powers inimical to life. To combat it is inescapably the duty of every well-intentioned and perceiving being of our time."

He spoke of Jewish persecution in "eastern Europe," and said "it is not easy to say where the western boundaries of this eastern Europe are to be sought."

Better Wheat Prices

Alberta Farmers Figure On Extra Profit To Be Made

Calgary, Alberta.—An additional \$100,000 will be placed in the pockets of Alberta farmers who have wheat still unthreshed, it is estimated by grainmen in figuring out the benefits of the price increase on grain exchanges.

Early snows in Alberta covered about 1,000,000 bushels of wheat. Farmers started threshing the grain this week and with the street price at 35 cents in Calgary at present, compared to about 20 cents in December, some much needed money will be obtained.

Bridge Made Safe

Calgary, Alberta.—Twelve men with picks and shovels removed the ice and spread gravel on the approach to the Arrowwood Creek Bridge, 20 miles east of High River, Alberta, where three men in 48 hours last their lives in automobile accidents.

The Nature Of Wealth

Capital Needed To Keep the Wheels Of Commerce Moving

The innocent are taught to believe that there is an abundance of wealth for everybody, and that were it not intercepted by the rich, it might be skimmed like cream, churned into butter, divided into pats, and equally distributed.

Wealth, which is no ignorantly desired because so ardently coveted, in what does it consist? When the ragged army of the French Revolution entered Holland their thoughts were centred upon the Bank of Amsterdam, reputed to be the wealthiest in the world; but when its coffers were broken open they were found to contain only a vast array of bonds and title-deeds, no longer of any value because unsupported by any law.

So it is with money; it cannot live save in the conditions in which it is bred. Today it represents much; tomorrow it might represent nothing. Money, indeed, is not wealth; but merely the wheels which give it currency. Wealth itself is something precariously and impermanent, as much a power as a material, like steam or electricity, driving by its million shafts and beltings the intricate machinery of civilization.

It is invested in all the industries and trades of the nation, partly fixed and partly floating; it cannot be drawn out without loss and must constantly be renewed; partly it is held in reserve against the day of renewal; partly it is imprisoned by the past, and partly it is connected to the future; partly it is buried underground and partly it is mortgaged to the vast supplies of food and raw material by which industry is kept at work and the nation in life.

It is in form and use infinitely various, and in every form and use requires expert handling. Labor is only one of the many elements out of which it is created. The mind of one man may make more wealth, as when Stephenson invented the locomotive, than forty million pairs of hands. Moreover, it must be stored in large parcels for great services.

Without it life would be "naughty, brutish and short," since it makes the difference between barbarism and civilization. The Russians, who destroyed their capital in the attempt to divide it, have stood ever since, like sturdy beggars, at the door of the "capitalist system" begging for the capital of other nations.

To draw this element out of trade and industry in order to divide it among the population is impossible, and were it possible would be suicidal.

The immediate result to the individual would be so small as to be nothing to his wealth; the ultimate result would be the ruin of the system by which he lives.—London Morning Post.

Job Is Centuries Old

City Of London Remembrancer Dates Back To Elizabethan Days

The Corporation of London has appointed L. C. Blackmore Bowker, aged 45, to the historic office of City Remembrancer, which carries a salary of £1,500 a year.

This appointment has existed since Elizabethan days. The City Remembrancer is charged with the conduct of many ceremonial duties which devolve upon the Lord Mayor and Corporation of London. The Remembrancer, in fact, is the medium of communication between the rulers of the city and the sovereign of the realm.

Prisoners Good Students

Inmates Of Prince Albert Penitentiary Best In Province

Several prisoners in Prince Albert penitentiary are making use of leisure time by preparing themselves for better things on their release.

Claimed by department of education officials to be the best students in Saskatchewan, eight inmates of the province's "Big House" are enrolled in Grade XI, correspondence courses conducted by the department. All have gained places on honor rolls. One student has created wide interest by an excellent essay on Woodworth's view of nature.

Polar Year Party Well

The polar-year party of Canadian scientists studying aurora and earth currents in Canada's sub-Arctic are enjoying the best of health and accomplishing their work on schedule. Letters from the party arrived at Churchill with the mail brought out from Chesterfield Inlet by Eskimo dog drivers.

TERRIFIC EARTHQUAKES SPREAD DEATH AND HAVOC IN CALIFORNIA

Our map shows that part of Southern California where more than 100 communities were wrecked by a series of violent earthquakes. A mighty upheaval in the ocean, southwest of Long Beach, was believed to have been the centre of the disturbance. The trail of death and destruction reached from Santa Anna to Hermosa Beach.

Conjuror's House

As Awe Inspiring Monument Of Nature In Northern Hinterland

Throughout Canada are many curious natural formations which appealed to the Indians as evidence of the supernatural. Their imagination peopled the vicinity of great falls, canyons and oddly shaped and placed rocks with spirits over which ruled their Manitou. As in more enlightened climes where gifts were offered to propitiate certain gods, the simple redman offered up his treasures to procure the care and guidance of the spirit which hovered over the virtual shrines which lay along his route. One of these places where Indian "medicine" was offered to Manitou stands in the rushing flow of the Missinabi River in northern Ontario, a tower of rock known from time immemorial as Conjuror's House.

Near Conjuror's House the turbulent Missinabi is hemmed in by high walls of gneiss between which the stream dashes with tremendous velocity. Hard against the rocky fastness of Conjuror's House the river hurls its might only to be divided, turned aside and madly rush onward to tumble in foam and spray over the falls below. Alone in its solitude stands this extraordinary columnar pillar rising sixty to seventy feet above the water. Travellers leaving the railway at Mattice and journeying by canoe down the Missinabi to Hudson Bay, pass this awe inspiring monument of nature as they portage past the rapid thirty-two miles north of the railway. Standing on the brink of the step-walled canyon, and gazing down on the huge rock, the present day traveller experiences some of the awe and wonder that seized the Indians at this place, and may feel some of the hidden things which the northland holds as its own.

Abandon Republican Flag

Emblem Of German Nation Is Now Old Imperial Colors

The republican flag was pulled into the discard as the emblem of the German nation by a decree of President von Hindenburg, which made the old imperial black, white and red the national colors.

The decree, which was announced nation-wide in a speech by Chancellor Adolf Hitler, also set out that the Swastika flag of the Hitler Nationalist Socialist party should share full equality with the imperial banner.

It provides that until further notice, the Swastika emblem be flown on public buildings simultaneously with the imperial colors.

New Process Is Quick

It requires only three minutes to transfer dissolved cellulose into finished yarn by means of improved machinery. The new process eliminates the use of refrigeration equipment, temperature-control apparatus, jacketed kettles, etc.

Invaluable Aid To Pilots

"Curved Radio Beam" Will Assist In Fog Landings

Military, mail and private pilots observed recently at Newark Airport the first public demonstration of the curved radio beam, "radio aid" equipment for aircraft, perfected by the Department of Commerce, Division of Aeronautics, following years of experiments.

A plane approaching on an established radio route was automatically signalled when five miles from the airport. A horizontal arm on a small dial guided the pilot to a point above the runway and a vertical arm showed him the proper angle of descent. Intensity of the beam was calibrated to record distance from the airport, and a shrill, sharp signal warned the pilot as his plane crossed the boundary of the field.

The new equipment required by the plane weighs only 15 pounds.

Because the one ground set installation was contrary to the wind, the plane used in the test touched its wheels to the ground and continued its speed.

Have Used Wheat

Information reaching the Government and repeated statements by speakers in the Legislature indicate an abnormal consumption of wheat on Saskatchewan farms this winter. Wheat has been fed to live stock, and, according to members from rural districts, is also being used to a considerable extent as a substitute for coffee.

A man has started from Chicago to walk round the world. The foolish fellow evidently doesn't realize that if he succeeds he will eventually land back in Chicago.

A Nation Of Shopkeepers

Japan Cannot Expect Much From Her Military Party

That Japan will prove herself unequal to the adventure on which she has rashly entered seems inevitable. As her financial situation grows worse and taxation becomes necessarily higher the glamour surrounding the military party today will quickly fade. At the moment the whole country has been united by the conviction that the world is against it, as on this issue the world indeed liberally is. But there is a latent liberalism in Japan. The Japanese like ourselves, are a nation of shopkeepers. Commerce and industry must see conditions established in which they can survive.—Spectator, London.

Doing Things In Big Way

Keeping Up With World Trend In Clothing Plenty

Back in 1904-6 it was not unusual to see Sir James Pliny Whitney pedalling his way to the Parliament buildings on his bicycle. Premiers don't do that nowadays nor would it be expected of them. The change in the methods of locomotion which has substituted a \$5,000 car for a \$50 bicycle is typical of the period through which we have passed in the last thirty years. Keeping up with the world trend we have become accustomed to doing things in a big way. And it has cost plenty.—Toronto Telegram.

Mabel—"What's worrying you David?"

David—"I was just wonderin' if Dad would see to the milkin' while we're on our honeymoon, suppose you said 'yes' if I asked you."

Women Cross Gobi Desert

Three Elderly English Missionaries Travel Safely Without Escort

Three of the bravest women in the world are in London, and they have told how they journeyed across the dreaded Gobi Desert where no white woman had been before. Quietly, modestly, they talked of dangers that would appal all but the most intrepid explorers.

They are Miss Mildred Cable, and two sisters, Miss Eva and Miss Frances French, missionaries of the China Inland Mission. And they think no more of blazing a trail of Christianity right across the Gobi desert, which takes 17 days to cross on camels, than anyone else does of taking an omnibus across London. Furthermore, they are typical elderly Englishwomen, white haired, rosy-cheeked and bespectacled.

"From our headquarters in Su-chow," Miss Cable said, "we went right across the Gobi Desert to the Russian border. That is about 2,000 miles. We and all our belongings were packed into two small carts pulled by two mules. There were just two personal servants, a carter and an evangelist with us. We never had an escort of any kind. The whole journey took three months, and for the desert crossing we rode on camels for 17 days. There is no food and little water, and we had to carry everything. Of course, we lived like Chinese women, and ate Chinese food. With concentrated foods our baggage could be reduced to a minimum, for our main cargo was the Scriptures, which we carried in seven languages. We have now been across the Gobi four times.

"During the last year our route has been the scene of much fighting. Brigades have been in constant battle with the Government troops. We had a lot of trouble, too, and were stopped several times. It was a little alarming, but we always managed to get through.

Roosevelt May Break Record Of Presidents

Health Now Promises Longer Life Than Sixty-Eight Years

Franklin D. Roosevelt takes over "the world's most difficult job" with a "statistical expectancy," based on the average age at death of the Presidents of the United States, of living seventeen more years.

Mr. Roosevelt is 51. The average span of life of the Presidents has been 68.3 years, with longevity honors going to the earliest Chief Executive, John Adams, living to a grand old 90, tops the list, while James Madison, who reached 85, was second, Thomas Jefferson, 83, was third, and John Quincy Adams, 80, fourth.

No other Presidents have reached the four-score mark. William Howard Taft, who died at 72, was the longest lived of the Chief Executives since James Buchanan, who attained the age of 77.

Mr. Roosevelt takes on the burdens of a White House regime with his physicians pronouncing him in splendid health, and his intimate associates declaring that he has a temperament "made to order," for withstanding terrific strain.

Franklin D. Roosevelt is nine years older than was Theodore, who took office as the youngest man to be inaugurated President. He was 42 when he succeeded the assassinated McKinley. Second youngest was Ulysses S. Grant, who was 46 when he first took the Presidential oath.

Grover Cleveland, who laid his hand upon the head of the boy Franklin D. Roosevelt, and expressed the hope that he never would have to bear the burdens of the Presidency, took office when he was four years younger than the same Franklin is today.

Sea Travel Fairly Safe

If a person made a trip on a British boat every year, he would have to live 3,000,000 years to lose his life at sea by fire, according to statistics presented by President W. T. McAllister to the Chamber of Shipping, to show the almost complete freedom of British ocean vessels from fire risk.

Looks Like a Mistake

At the opening of the civil war an Iowa man was rejected by the examination board as too frail for military service. As he celebrated his 102nd birthday anniversary in California recently, he had almost reached the conclusion that the board had been mistaken.

While the human population of the world is estimated at 1,840,000,000, the rat population is placed at 10,000,000,000, or more than five rodents to every human.

Gardening Notes

By Gordon Lindsay Smith

Most pruning is carried out in March, although where only a little work is to be done it is better left until growth is further advanced. There is one exception to the latter statement, however, and that applies to grapes. To avoid excessive birding, vines of this fruit must be pruned while absolutely dormant and this means before the middle of March. In pruning grapes the best plan is to remove all but a bare skeleton as the fruit is borne on new growth each year. In the commercial fruit districts all but the trunk and two laterals which way are left when the men are through with the knife and clipper.

In pruning fruit trees, the main thing is to open up the branches to admit plenty of light and air and to prevent the growth of branches at a wide angle from the main structure as such, while liable to break off when loaded with fruit. Branches which cross and rub against each other, of course, should be removed. In the smaller garden it is important to keep all fruit trees headed back, for convenience in picking. Where there is not too much shade it is quite possible to have cherry, plum, peach, pear and apples bearing on branches within a foot of the ground. In fact, in the older countries and also on the prairie most fruit trees are trained so that they branch out close to the bottom of the trunk. Except for a little training it is not necessary to do much pruning until the fruit tree comes into bearing. If it is necessary to remove limbs, the wounds should be painted over or coated with grafting wax to prevent rot setting in and to encourage rapid healing.

Flowering shrubs also benefit from a light thinning early in the year, before they have reached maturity. Those that bloom early in the spring or summer should not be pruned until after the flowers fade. A little of the old growth and as many of the dead blooms as possible should be cut out. Late summer pruning is a business severely pruned back each year, while the climber is in customary to take out a good deal of the old wood any time after the bloom is over.

With raspberries, take out all the year-old canes following fruiting as next year's crop will be borne on the canes produced this summer. Merely keep currant bushes from becoming too thick or the main stems too old.

Perennials

Often there is far too much reluctance to sow seeds. Not only do most of these things benefit by a change of quarters every year, but the constant re-arranging and development of new beds constitutes one of the joys of gardening. Perennials are periods when moving is most successfully carried out, in the early spring or in August. Perennials are usually dormant and lifting the whole clump or a portion of it, dividing and re-planting. Perennials in moist earth can be carried out with little harm.

There are few exceptions to the general rule. Oriental poppies for instance, rather difficult to handle at any time, should be moved in August, while late bloomers like the Delphinium are best planted in October.

In work of this kind one should bear in mind that the secret of successful transplanting is speed in getting the roots into the ground and plenty of water. The soil must be pressed down firmly all around the plant. Care must also be taken that the flower is set to the same depth as before, with particular attention paid to the roots. The covering of the small roots is enough for the farmer, while an inch on top of the crown will do for the gardener. Before laying out a new perennial bed or renovating a piece of old one, dig in plenty of fertilizer to work up the soil as fast as possible.

Car Insurance Legislation

Alberta Being Brought Into Conformity With Other Canadian Provinces

The Alberta legislature has approved new automobile insurance legislation which will bring this province into uniformity with other Canadian provinces in this sphere.

Under the new act, every car owner's policy must insure the person whose name is on it and every other person who, with the owner's consent, uses the automobile. It also provides any person injured through negligent operation of the auto has a right, upon getting judgment, to receive money from the insurer.

Listened To Inauguration

The inauguration of President Roosevelt on March 4, was heard by the royal family and high British officials. The King and Queen listened to the broadcast at Buckingham Palace and the Prince of Wales at Fort Belvedere, his country residence. Prime Minister Ramsay MacDonald heard it at Chequers Court.

Has Good Start

An Edmonton barber is reported to have accepted a dog, two canaries and a statue of Mozart in exchange for haircuts, shaves and shampoos. Now all he needs is a kennel, a package of bird seed and a grand piano.

CHAPTER VII.—Continued.

Alan told why he was looking for an airplane, sketched the strategy of his campaign, explained his whole daring plan of running the bandits to earth.

He asked, "Will you go, Buzzard?" It was so very simple a question, but there was a prayer in his voice and eyes.

"Will I go?" Buzzard echoed, almost angrily. He put his fist down on the table so hard that the salt shaker jumped. "Will I go—on a trick like that? H—his bells, what a question! Would I kiss my girl if she asked me to?"

Alan checked him. "Just a minute, Buzzard. Let's get a couple things clear. One is the matter of pay. I've got a couple hundred dollars in my pocket and five hundred coming by wire. It'll probably take all that to outfit us, so right now I can't pay you one red cent. But I'm going onto a good-salaried job, and I'll pay you before the year's over."

"How much are you getting out of this?" Nothing. Good! I'll take the same.

"But it's my affair, my quarrel."

"Then I'll harm in on it. And besides, I'll get my pay out of it in the long run. Look at the publicity value, Alan. If we pull a stunt like that! With all the headline advertising I'd get."

"But supposing your machine gets wrecked down north somewhere? It'd be a total loss. I couldn't pay you back for a long—"

"Usually when a fellow's plane is a total wreck, he doesn't worry much about the loss. All he cares about is a nice headstone."

"But look here now, and get this straight. We haven't a right to pull a trick like this, Buzzard. We're stepping outside the law. We're violating several hard and fast statutes. I happen to know."

Buzzard grew impatient. "Suppose we get down to essentials. You said you wanted to leave as soon as you could. Then let's talk sense. How about gas? This car of mine isn't one of those transatlantic planes. It'll do about seven hundred miles in a pinch, and then it stops and sets down. I'll have to get a pack-chute for you. A decent one'll cost three hundred. I've got to put on a new propeller; that footpunch on the old crate now is about ready to quit. A new prop costs like sixty. Then we need navigating instruments on a long trip like this. They came high. I could use fifteen hundred dollars."

Alan paled a little, but he said doggedly: "I'll raise it. I'll raise it somehow."

EXCESS FAT RUINING HER HEALTH

Better After Losing 14 lbs.

There are a number of bodily ailments that are apt to arise in overweight men and women, and if excess fat is reduced in the right way, very often improved health follows—as it did with this woman.

"I used to have a great deal of fat that seemed to nearly stop me breath'g, especially when I knelt down to do any housework, or was walking up a hill. I would simply have to fight for my breath for about 20 minutes. But now that has gone, thanks to Kruschen. I have lost 14 lbs. in weight, and am able to get about in comfort. I can work all day and not feel tired. I feel so much better, and am so pleased to have lost some of the fat that was steadily gaining ground with me, and ruining my general health."

"S. G. V. STEELE."

There are six vital mineral salts in Kruschen. These salts combat the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue. Unlike ordinary aperients, Kruschen does not confine its action to a single part of the system. Its tonic effects extend to every organ, gland, nerve and vein.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now! We will send you a trial bottle of "GIANT" Kruschen which makes it possible for you to give it a trial for 14 days.

Ask your druggist for the new "GIANT" 75c.

This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your trial bottle immediately and without question. You have tried Kruschen free, at our expense. What could be fairer?

Write to: Kruschen Laboratories, Ltd., 1111 Finch Avenue, East, Toronto.

rendezvous arranged with his new-found partner.

Buzzard had put in some busy hours too. He had filled up on gas and oil; had attended to several repairs and replacements; had acquired a packchute, new propeller and half a dozen costly flying instruments.

With a couple of mechanics whom he had awaited at an all-night garage, he was busy putting on the new prop.

Vaguely suspicious, Alan took him aside and asked quietly: "Say, Buzzard, how did you get all this equipment? You've got more than a thousand dollars' worth here, and you only had two hundred—"

"I borrowed that stuff temporarily. There's several government 'planes here, and they had extra equipment."

"Borrowed? Temporarily?"

"Well, stole it!"

"Stole it? Government property? Good Lord, man! That's a penitentiary offense. The authorities will send sure catch on to who took it."

"Yes, I expect they will. At least the night watchman'll know. I've invested five dollars in liquor for him; and he's sleeping it off over behind that hangar. He'll put them next to us."

Buzzard's voice became serious. "But Alan, I couldn't get it any other way. We simply had to have it, or give up our trip."

"Yes, we had to have it," Alan admitted reluctantly. "I guess you did right, Buzzard." But it staggered him to realize that he and his partner were criminals now in the eyes of the law. Their motives would be no excuse. They faced a prison term if caught. And their capture was inevitable; soon or late they would have to show up somewhere.

He could not bring himself to reproach Buzzard. He himself had stolen a machine gun, though he had covered his tracks pretty well; and Buzzard after all had done this for his sake. And he felt that this theft was justified, if ever theft could be.

With no chance of personal gain, at heavy cost of their own hard-earned dollars and at risk of their very lives, he and Buzzard were flinging themselves against a pack of murderous criminals.

He said: "We'd better be getting away from Edmonton forthwith. At daylight there'll be people here on the field. I'll be our first if we're not gone."

"They donned their flying togs. Buzzard showed Alan how to put his pack-chute, how to jump clear in case of disaster and jerk the rip-cord. They climbed in and snapped their safety belts.

Revering up in short order, Buzzard flocked the throttle, jumped over the chocks, taxied down the field, and gave it the gun.

Just as the first rosy fingers of dawn were reaching up into the eastern sky, they hopped off, left the sleeping city behind them, and roared away into the North.

A certain vine from tropical Africa will cling to glass and eat away the surface when planted beneath a window.

Missing Clues Which Hamper Scotland Yard

Crown Never Prosecutes Until Chain Of Evidence Appears Complete

Scotland Yard never slumbers. In that sleepless department an unsolved crime is not a pigeon-hole crime. And only death or conviction writes "completed" on a dossier, says a London newspaper.

During the last few years there have been several murders of callous brutality and cunning. The miscreants are still at large. But in three cases the "Yard" are satisfied as to their identity.

The Crown, however, never prosecutes until the chain of evidence is—or appears to be—complete. In those three cases there is a missing link. Given that, and the chain would be complete. The search for it is unceasing.

In one of the cases certain events have brought its discovery nearer. And sensational developments are not unexpected.

In the Furnace case a detective played the part of a street musician. Equally ingenious guises and disguises are adopted frequently.

For instance, an observer not long ago might have seen on a country road not far from London a few workmen with the usual road-repairing paraphernalia engaged upon some repairs. But if he had carefully watched he would have noticed that the men dug out and filled in the same hole time and time again!

The repairs were policemen, and the "night watchman" a lynx-eyed detective. The movements of a man under suspicion for a grave crime were under observation.

In another case a suspected person in thought that the man who delivered the milk was a police officer, and in a case in which the police wanted close and minute examination of a suspect's features and certain peculiarities in speech, the broken-down old man who delivered the morning newspaper was some other than a well-known detective.

In one sensational murder case—as yet unsolved—the police obtained important clues in finger-prints. They are satisfied as to the owner of those fingers, but no finger-prints can be taken before a person is arrested—and only with some difficulty after—and in the absence of those prints they are unable to effect an arrest.

But they are patiently waiting.

It has been urged that there should be a system of universal registration of finger-prints. Were that system in operation, more than one murder now unsolved would have been explained.

A comparison of the finger-prints found at the scene of the crime with those who would complete the identification and provide the link so urgently required.

THE RHYMING OPTIMIST

By ALICE MICHAELS

NAMES

Elizabeth has history's aid To lend it dignity.

Little Phyllis suits a rustic maid While Peg is wild and free. Patricia has a queenly sound, Song dwells with Margaret. A Judith must with pride be crowned; But Lisa is so sweet!

Leonie strikes a worldly note, Avis is quick and quaint. Colla should have a swan-like throat And Faith must be a saint. Elaine and Beatrice are cool As some flower-strewn retreat; Shirley is like a mountain pool, But Lisa is so sweet!

Forgeries of famous paintings have been detected by means of photography, which reveals the differences of brushwork and mediums between old and modern paintings.

Great Britain exceeds the United States in imports, but not in exports. Great Britain ranks first in the value of exports and imports combined, with the United States second.

Sure Signs

of kidney troubles are pain in the back, difficult urination, deposits in urine. Gin Pills relieve kidney troubles gently, soothe and heal the inflamed tissues. 50c a box at all druggists.

HEADACHE

Here's Quick Relief:

Aspirin brings you immediate relief. It acts before you can feel any effect at all from the slower forms of relief.

Do not hesitate to take Aspirin tablets because of this speed. Their quick action is due to the fact they dissolve immediately. They are perfectly safe. They do not depress the heart.

That's the beauty of a remedy like Aspirin. Anyone can take it, as often as there is any need of its comfort. In sufficient quantity to get complete relief. You could take Aspirin every day in the year without ill effects.

When you want relief from headaches, colds, neuralgia, or neuritis, periodic pains, etc., stick to Aspirin. You know what it will do, and you know what you are taking.

The new reduced price on bottles of 100 tablets leaves no reason for experimenting with any substitute for relieving pain. Insist on Aspirin.

ASPIRIN

has SPEED!

TRADE-MARK REG.

Most Famous Spy-Glass

One Owned By Lord Nelson Recently Sold In London

An auction sale was held in the West-end of London, England, recently and a spy-glass was put up for sale. It brought the equivalent of \$7,700 par value. It was not nearly as good as any modern spy-glass costing a few dollars would be, nor was it encrusted with diamonds. But it was probably the most famous of its kind in the world.

It was the glass that Nelson held up to his blind eye and said, quite truthfully, that he did not see an overwhelming armada bearing down upon his fleet at Trafalgar.

At the same sale \$800 was paid for the silver watch presented to Midshipman Pollard who killed the sharpshooter who mortally wounded the British Admiral.

Prince Conducts Band

The Prince of Wales, using a drumstick for a baton, conducted the band in a lively footstep at the St. David's Day dance given by the 1st Battalion of the Welsh Guards, of which he is the Colonel. The Prince's rendition was repeatedly encored until he laughingly told the dancers that conducting was more strenuous than dancing. Later he acted as master of ceremonies, selecting the tunes.

The submarine is regarded as a modern invention, but the first one was really built in England in 1620. It was a wooden shell, covered with leather, and navigated by 12 rowers.

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Women Nowadays Do Not Like Title Of "Grandmother"

Is the name "grandmother" losing some of its ancient charm and dignity?

In claiming to be the youngest bearers of it a surprising number of our women readers have protested against being known as "grandmothers."

The sum of their complaints is that the term implies that a woman is not merely old, but out of date.

Queen Mary is a grandmother, but, modestly apart, has any one dared yet to rank her as out of date? Lady Oxford is younger than most women of her years, but she does not scorn being called "grandmother."

"Grandmother" is a distinction of which no woman young or old, need be ashamed. It is her title-deed to the inestimable privilege of a second stake in the future.—London Daily Express.

The Last Word

An American and a Jewish traveler were in the same railway carriage.

"I wanna tell, and let it soak in," said the former, "the village where I hail from hasn't a Jew. Get me?"

"Yes," replied the Jew, "that's why the place you came from is a village."

A colored man was pleading his own case to save expense. He called the chief witness to the box and demanded:

"Joshua, where was I when we stole them chickens?"

"Do you know where you are?" demanded the tourist's wife.

"No," he admitted. "I'm as lost as the average American is when he starts on the third verse of the national anthem."

"The Big Broadcast"

Featuring a Night With SETH PARKER

Also
Music : Comedy : Dancing and a Symphony Orchestra

Under the auspices of the Crossfield United Church.

Adults 25c Children 15c
Reserved Seats 35c. Seats on sale at McClelland's Drug Store.

Coming Events

Friday night of this week, in the U. F. A. hall the Carstairs Dramatic Society present "The Big Broadcast." This play comes highly recommended and is two hours of high class entertainment. Don't miss it.

On Friday, March 31st, the Crossfield School Fair Association are sponsoring a Grand Concert in the U. F. A. Hall. All the schools in the School Fair are contributing parts to this programme. A big night with the kiddies that is sure to please. Get your ticket now and avoid the crush. Reserved seats now on Sale at McClelland's Drug Store.

It must have been obvious to everyone that the last two School Fairs have been severely handicapped for lack of a building in which to properly set out the exhibits.

The fair ground buildings which are now in the possession of the Rosebud M. D. No. 280 are falling into such a state of decay as to soon be of no use to anyone.

After some negotiations between the Crossfield and District School Fair and the Council of Rosebud, the Council graciously offered to erect a building; using up such lumber as may be available from the old buildings, and to furnish the balance of the lumber necessary to complete the building, up to a sum not exceeding \$100.00. The School Fair Association on their part to furnish the labor necessary to demolish the old grandstand, which has been unsafe for years, and to erect the new building.

This seemed to be the only method for the School Fair Association to get a building suitable to their needs, and it is to be hoped that when the call goes out, (after the crops are planted) for volunteer labor to do this work, there will be a willing response.

The School Fair Association are grateful to get a building, for the opportunity offered to get a building, and it would be just too bad to have to put up for the want of a little volunteer help.

GET BUSY BOYS

There will be a special prize for the boy or girl who brings the most gopher tails to the School Fair. More particulars later.

The Crossfield Oddfellows entertained at a very enjoyable social evening in the Masonic Hall on Wednesday evening of last week. Eleven tables of court whist were played and the winners were: Ladies' first, Mrs. Annon of Wayne; gent's first, W. H. McCool; consolation prizes going to Mrs. W. H. McCool and A. J. Sackett.

A dainty lunch was served at midnight following which dancing was kept up until 2 a.m. The old time tunes played by Geo. McCool on the fiddle, to the accompaniment of the piano, played by his son Bill, were certainly a treat. Mack Ferguson and Clarence Richardson also played some of the old favorites as well as the more jazzier numbers.

It was a grand night and we hope the Oddfellows will have more of them.

"If these stubborn Scotchmen around would raise some good Percheron horses instead of these shaggy-haired Clydes, they could sell them at a fair price."—Archie McFadyen.

It Pays to Advertise

Harry May lost his dog, inserted an ad in the Chronicle and two hours after the paper came out he had his dog home. Evered Bills lost a saddle horse, and after spending two days looking for him, gave it up as a bad job, drove into town inserted an ad in the Chronicle, and within a few hours after the paper came out, he was notified by a reader of the Chronicle, where to find his horse.

Ian Laut lost a pig, advertised in this great family journal, and in 24 hours after the paper came out, he was notified by four different farmers, that each of them had found his porker.

There are probably 100 people in this district looking for just the article you want to dispose of. Why not tell everybody about it?

You will be surprised how little it will cost you.

Local News

A number from town are attending the Oldacre auction sale today.
Mrs. Lennon wife of Geo. Lennon, manager of the Atlas Lumber Co. Carstairs, passed away this morning (Thursday.)

G. Williams, E. Bills, W. Miller attended a meeting of the Amateur Baseball League at Calgary on Wednesday evening.

J. R. McTavish has moved onto the Boyle farm. Mr. and Mrs. J. Boyle have moved to Calgary.

Mrs. A. A. Halliday left on Monday to visit her daughter, Mrs. P. C. McCrea at Bassano.

The Gittle family have moved into the living rooms over Shea's old store building.

The next dance in the East Community Hall will not be held until after seeding, May 24th.

The local wheels of justice are all oiled up for a busy day on Thursday.

Keep in mind the dance in Beaver Dam Hall on Friday, March 24. This is a baseball benefit dance and the boys guarantee a good time.

The Ladies Aid wish to thank all those who contributed to the success of their Valentine tea.

The Southern Alberta Dairy Pool recently paid 1 cent a pound bonus on all cream handled by them last year.

H. Robinson who has been farming the Lasher section west of town, has moved to a place east of Olds.

Mrs. Annon and daughter Beatrice, who have been visiting Mrs. Cruickshank returned to Wayne on Sunday.

Owing to the perseverance of one of our local farmer east of town, Happy McMillan is now able to receive his many telephone calls sitting in his chair.

Don't forget your membership to the Board of Trade. One dollar invested in this organization will pay big dividends.

The Ladies' Aid of the United Church realized the sum of \$28.00 at their Valentine tea held at the home of Mrs. Young on Friday last.

The regular meeting of the Floral Local U.F.W.A. will be held at the home of Mrs. Verne Thompson on April 15th, at 2.30 p. m. Roll call—Current Events.

At the present time there is no restriction placed upon the carrying of passengers by trucks in this province, Premier J. E. Brownlee informed the legislature on Monday.

The Womens' Guild are holding a sale of fancy work and home cooking at the home of Mrs. Mosop on Saturday, April 22. Tea will be served from 3 to 6.

George Oldacre is holding an auction sale of his farm equipment at his place near Madden today. (Thursday.) Mr. Oldacre is moving to Calgary, where he is in the employ of King George.

F. J. Reynolds, General Manager of the Southern Alberta Dairy Pool will address a meeting in the U. F. A. Hall on Saturday, March 25, at 2 p. m. All cream producers of the district are invited to attend this meeting.

A surprise tea was held at the home of Mrs. (Auntie) Adlerly on Wednesday afternoon, in honor of her birthday. Mrs. Adlerly was the recipient of many beautiful gifts and the best wishes of her friends for her continued good health.

More than 400 farmers caused postponement of the auction sale of farm stock and implements on the farm of Thomas Dillon, near Petrovia, Ont. Three implements valued at \$200 were bid in at 96 cents, and a cow worth \$20 brought only 30 cents. Excitement was high and arguments frequent during the sale.

Due to the small bids the sale, called the sale off.
